1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Donald R.

Studebaker on 06-20-05.

The application has been amended as follows: claim 4, line 21, " the first sub-CMOS" is now – a first sub-CMOS--.

2. The following is an examiner's statement of reasons for allowance: The examiner could not find fair suggestion for the plural temperature dependent resistances in the inverter circuit in addition to all else claimed, also, no suggestion for the first and second sub-CMOS inverter circuits; and the oscillation period determining device as claimed. The references to Sundaram et al(US 6,163,225) and Nishikido(US 6,803,831) disclose ring oscillators with inverters and delay circuits with RC elements; these are relied on to show the general use of such elements in the ring oscillator.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled " Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arnold M. Kinkead whose telephone number is 571-272-1763. The examiner can normally be reached on Mon-Fri, 8:30 am -5 pm.
